

While its true that XM does NOT provide local traffic and wheather to the Denver market, it does provide this service to MANY area's that I travel. Taking this infomation away from XM (or anyone else that might want to provide this type of information) is a clear violation of several monopoly laws. To FORCE someone to listen a particular channel means I give up a freedom to listen (or watch) what I want, When I want, Where I want! This would be the first in MANY steps towards GOVERNMENT SENSORSHIP!

Do NOT remove this service from XM (or anyone else that would want to broadcast it) for the above reasons!

Its one thing to remove someone from the ari that is using foul language, its a different matter to remove programming that is VITAL information to the public!
